DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 10-17 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over DE 19520103 (abstract) (herein referred to as “DE ‘103”).

DE ‘103 teaches alkyl substituted butenol of formula I that is prepared by reacting an aldehyde of formula II with the corresponding lower aldehyde, III, and then reducing the unsaturated aldehyde product IV. The aldol condensation reaction step is carried out in an inert solvent. The reduction reaction step is carried out in the presence of optionally calcined copper-zinc catalyst. DE ‘103 teaches that the lower aldehyde is propionaldehyde. DE ‘103 teaches that R1 is a 4-(2,2,3-trimethylcyclopent-3-en-1-yl) group. DE ‘103 teaches that the organic solvent is toluene. On page 3, lines 60-61, detail that the temperature of the invention is between 20-

150°C, especially preferred to be adjusted to a reaction temperature in the area of 40-120°C. It is the Examiner's position that the LHSV property is inherent to DE '103. To the extent that the property is not inherent, it would have been obvious to one of ordinary skill to modify DE '103 to encompass such a property in order to optimize the process of producing the alkyl-substituted butenol.

When a reference discloses all the limitations of a claim except a property or function, and the Examiner cannot determine whether or not the reference inherently possesses properties which anticipate or render obvious the claimed invention it is proper to shift the burden of proof to applicant as in *In re Fitzgerald*, 619 F.2d 67, 205 USPQ 594 (CCPA 1980). See MPEP § § 2112- 2112.02.

Response to Arguments

4. Applicant's arguments with respect to claims 10-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1743

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
